

Vishing Credit Card Information Reported

A new Vishing event has been reported. Members are reporting receiving a phone call or recorded message alerting them that their Northeast Credit Card has been deactivated and if they want to activate the card to dial 1. Members should not dial 1 or provide any information pertaining to their personal information. Members also report receiving this same type of call stating that another credit union or bank's card has been deactivated, even though they are not members with that financial institution. Please be assured that these people do not have your member information and we are working with authorities to shut them down.
